Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 1, 10 and 14 set forth at least one of the parameters \hat{A} and λ . The specification does not clearly disclose how the parameter \hat{A} is formed. The disclosure does not clearly define the meaning of λ only that it is a "controller zero value". What does this phrase mean?

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The following variables are not defined in the claims: Claim 1; \hat{A} , $\ddot{\theta}_d$, \dot{e}

Claim 3; \tilde{A} , e_1 , e_2

Claim 4; \tilde{A} , $\ddot{\theta}_d$, \dot{e}

Claim 10; A

Claim 15; $\ddot{\theta}_d$, \dot{e}

Allowable Subject Matter

Art Unit: 2651

It appears that if applicant overcomes each of the 35 U.S.C. 112 rejections (first and second), then the claimed invention would be allowable over the art of record.
